Organizations Succeed with Microsoft Teams

Adopting Teams — Your High-level Overview

Organizations of all sizes and all stages can benefit from the implementation of the Microsoft Teams Platform. Our experts can help you assess your situation, requirements and options. Somethings that need to be part of the conversation include:

Bandwidth and Connectivity: organizations today need to be data nimble, with both the required data capacity and a variety of access points

Infrastructure: There may be one solution that meets your needs, or it may be a dynamic configuration that blends off-the-self, legacy and crucial third party solution requirements

Licensing/Calling: Organization demands change over time — with growth, changing needs or in response to your particular industry

Security/Data Integrity: data is a universal asset, and also a large target for ill-players. Our expert team can provide strategies to limit your threat surface, minimize you potential for incursion and proactively prepare your organization to recover in the event of a breach.

12 reasons to use Microsoft Teams

1. Access the Full Eco-system of Microsoft Products
2. Scalability and Universal Platform
3. Structured Workspaces
4. Empowered Collaboration
5. Flexible and Interactive Meetings
6. On-the-Go Communication - secure chat, messaging and video conferencing
7. Secure Phone Systems (including calling plans)
8. Easy Third-Party App Integration
9. Security and Compliance
10. File/Data Storage
11. Cloud integration
12. Expansive Contact Center potential

"

Ask Yourself, "What do you want to achieve with Microsoft Teams"

a. *Productivity*
b. *Collaboration*
c. *Connection*
d. *Cloud telephony solution*
e. *all of the above*

We are the Planning, Deployment, Management Team

We're ready to join you wherever your productivity conversation currently stands. We'll run through our check list, catching any potential problems, and help you more your implementation forward. Here are a few common scenarios we work with, where clients are:

- Early on, weighing options, including whether Teams is right for the organization
- The Teams decision is made, but not much else is
- The basic connectivity is in place (cable, fiber, etc) but nothing else
- Licenses are acquired...overwhelmed by deployment and integration
- Teams is fully deployed, concerned about security and on-going management

Let us Support Your Team Through
