

SATISFY GUESTS TECH CRAVINGS AND WATCH YOUR BUSINESS THRIVE

Hospitality venues such as cafes, restaurants and bars need a reliable and cost-effective network solution to enhance the guest experience, increase revenue, and maintain compliance with data security regulations. With the growing trend of online orders and delivery, it has become crucial to have a robust network infrastructure to process orders and maintain guest satisfaction.

Implement The FCX All-In-One Plan Save 10% - Increase Revenue by 18%

Our low-cost network services provide a **complete solution for all your business needs**. Our comprehensive package includes a basic internet circuit, WiFi, 4G back-up, managed firewall and end-point detection and response (EDR), point of sale and basic point-of-sale (POS), unified communications as a service, and a managed camera system and a TV entertainment system.

Our services are **designed specifically for hospitality** and can be implemented in any location where there is a need for a secure and reliable network. Whether it is a cafe, a restaurant, bar or a hotel, our services can be tailored to meet your specific requirements.

The installation and setup process are quick and efficient, ensuring minimal disruption to your business operations. **By setting this up, hospitality businesses tend to save 10% on their overall IT bills and increase their revenue all the way up to 18%.**

■ Increase Guest Service

Have guests enjoy uninterrupted, high-speed internet access through WiFi and TV Services. This will significantly enhance their experience, making them more likely to return and recommend your business.

■ Introduce Guest Reward Programs

The POS systems FCX offers through partners integrate guest reward and loyalty programs, providing you with a valuable tool for customer loyalty and retention.

■ Stay Compliant Avoid Mayhem

Compliance with data security regulations, such as PCI DSS, is crucial around credit card data. Our network services are designed with security in mind, so you avoid damage to your reputation.

■ Lower Threat of Cyber Hacks

The threat of cyber-attacks and data breaches is a constant concern for hospitality businesses. Our managed firewall and EDR services provide an added layer of protection to your network.

■ Online Orders - Delivery and Pickup

With the POS systems our partners deliver, your business can easily handle online orders for pick up and delivery, allowing you to tap into the growing market of online food ordering. Lower staff head count and increase repeat business.

■ Eliminate IT self-maintenance

The low-cost network services we offer come with technical support, eliminating the need for you to manage and maintain the IT infrastructure yourself. Call the FCX helpdesk or provider instead.
